

SC-8203A SIDE WALL MARKING PRESS

APPLICATION:

- * Side wall marking press machine (As called sole marking machine) is used in the assembly area for the production of men's and women's shoes of different kinds.
- * The machine is designed to draw a clear line of the gluing level of the sole. The equipment helps to ensure an accurate level of glue application and to connect the upper part of the shoe to the sole in the right place.
- * The sole platform is made of good-quality material, which helps to press the sole to the last tightly. There is no need to add any other material.
- * This machine is operated by pneumatic pressure. Setting up the Sole marking machine includes adjusting the pressure force, speed, position of the front and back feet. The position of the presser feet and the pressure force can be adjusted by using convenient adjusters.

FEATURES:

1. Suitable for sports and casual shoes
2. Accurate marking position makes upper roughing and gluing processes better and easier
3. Equipped with digital pressure gauge with regulating value, easy to monitor pressure
4. Choices of pointer type barometer or digital display
5. Base composed of 27 high-quality elastic PU rubber blocks with different radians to ensure matching closely with soles
6. Double cylinders automatically balance

Spec:

Outer Package Dimension (cm): 65*55*178

G.W.: 90 kg

Voltage: 220V

Phase: 1

Power: kW

Hz: 50

AMPS: 0.3

Air Consumption: 0.6Mpa

Pairs/Hour: 200
